The diagram illustrates the experimental setup for measuring the fluorescence lifetime of a sample. A laser beam is directed through a series of mirrors and lenses to illuminate a sample. The setup includes a laser source, a beam splitter, a mirror, a lens, and a sample. The diagram shows the path of the laser beam and the resulting fluorescence signal.

The image is a highly degraded scan of a document. It appears to be a form or a report with a header section at the top. The text is completely illegible due to the low contrast and noise. There are some faint markings that could be interpreted as checkboxes or small icons, but they are not clear enough to identify. The overall structure suggests a formal document, but the content is lost.

# Abalos takes back proclamation plan

MANILA, May 11 (AP) — President Gloria Macapagal Arroyo's administration has decided to scrap a plan to issue a proclamation that would have allowed the government to take control of the country's media and telecommunications industry, a senior administration official said.

The official said the decision was made after a series of consultations with key government officials and members of the media. The official said the government had been considering the plan for some time, but it had been put on hold because of concerns about its impact on the media and telecommunications industry.

1. *Chlorophyll a* (Chl *a*) is the primary photosynthetic pigment in most plants. It is a green pigment that absorbs light energy in the blue-violet and red-orange regions of the visible spectrum.

2. *Chlorophyll b* (Chl *b*) is an accessory pigment that absorbs light energy in the blue and orange-yellow regions. It transfers the energy to Chl *a* for use in photosynthesis.

3. *Carotenoids* are accessory pigments that absorb light energy in the blue and green regions. They also transfer energy to Chl *a*. Carotenoids include *carotenes* (orange) and *xanthophylls* (yellow).

4. *Xanthophylls* are a class of carotenoids that are involved in photoprotection. They can convert excess light energy into heat, preventing damage to the photosynthetic apparatus.

5. *Phycobilins* are water-soluble pigments found in cyanobacteria and red algae. They absorb light energy in the green and blue-green regions and transfer it to Chl *a*.

SM Prime Holdings Inc. is considering a P2.8 billion loan to fund its expansion in the Philippines, according to sources familiar with the company's plans. The loan would be used to finance the construction of new retail and commercial buildings, as well as the acquisition of existing properties. The company is currently in the process of raising capital through a public offering of shares, which is expected to be completed by the end of the year.

The loan would be provided by a consortium of banks, including the Philippine National Bank (PNB) and the Security Bank Corporation (SBC). The terms of the loan are expected to be negotiated over the next few months. SM Prime is a leading real estate developer in the Philippines, with a portfolio of properties worth over P100 billion.

The company's expansion plans are part of its long-term strategy to increase its market share and improve its financial performance. SM Prime has a strong track record of successful real estate development, and the new loan is expected to further strengthen its position in the market.

How to live in the city with a budget

Home Body

## WELCOME TO THE WORLD

Living in the city with a budget is not easy, but it is possible. Here are some tips to help you get started.

**WELCOME TO THE WORLD**

Living in the city with a budget is not easy, but it is possible. Here are some tips to help you get started.

**1. Find a room to rent.** Look for a room in a shared house or a small apartment. This will be cheaper than renting a whole house.

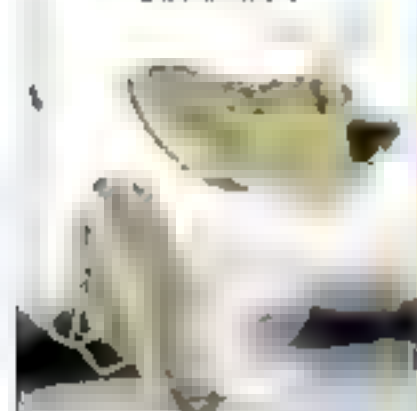

**2. Cook your own food.** Eating out is expensive. Cook your own food and eat at home. This will save you a lot of money.

**3. Use public transportation.** If you have a car, you will need to pay for parking. Using public transportation will be cheaper.

**4. Shop at discount stores.** Discount stores like Aldi and Lidl offer cheaper prices on groceries and other items.

**5. Use free services.** Many cities offer free services like libraries and community centers. Use these services to save money.
